

BRIDGING DIGITAL DIVIDE

**Connecting
business**

Company Profile

OVERVIEW

Bridging Digital Divide (BDD) prides itself in being able to engineer and implement point-to-point and multi-point transmission networks across southern Africa. These solutions – including aerial and underground fibre installations, as well as the many variants of fibre optic access infrastructure (FTTX) – facilitate the shift to digitisation, helping businesses adapt to the changing requirements of the digital age.

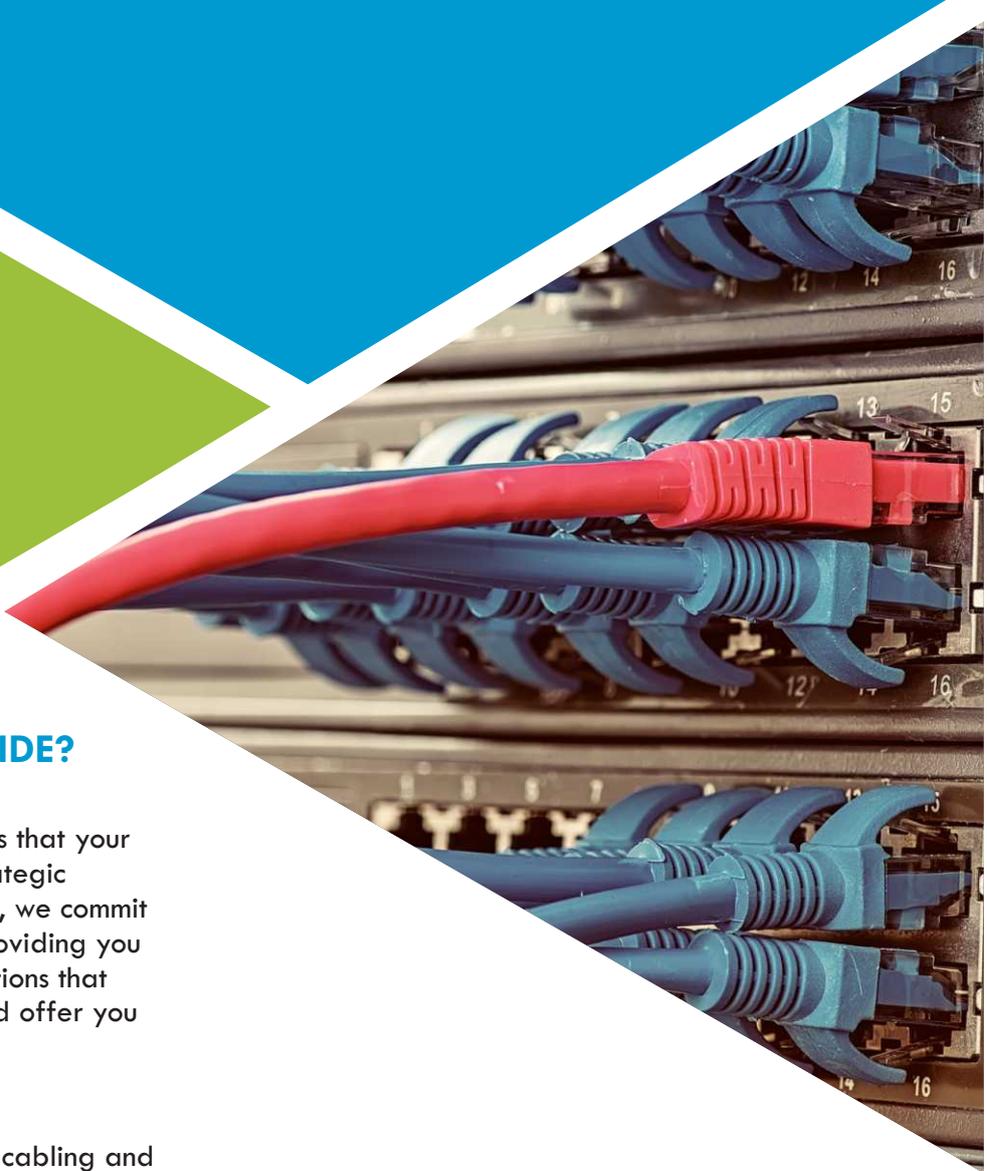

We specialise in planning, designing, installing and maintaining structured cabling systems that are flexible and scalable to match our clients' requirements.

Fuelled by a passionate commitment to our client relationships, we're persistent in finding the best-fit solutions and technology to ensure optimal business outcomes and the continued success of our clients. We constantly seek to improve our capabilities, capacity and resourcefulness that manifests in quality, consistent service and superior delivery satisfaction.

Bridging Digital Divide is a black-owned ICT infrastructure and telecoms company that provides structured cabling and fibre and wireless networks to public and private clients in South Africa. We provide integrated strategic corporate services and leadership through our professional services and diversified offerings.

AT A GLANCE

- BDD is an accredited Commscope KRONE installer.
- All our technicians are FOA certified.
- We offer a 25 year warranty on all our installations.
- BDD has over fifty years of combined structured cabling design experience.
- Our in-house designers are certified RCDDs.
- Our experience in vertical and horizontal connectivity projects spans a wide variety of industry and commercial network cabling applications.
- BDD is proficient in all aspects of network technologies and LAN solutions such as CAT 5e, CAT 6(a) and fibre optic network design.

WHY BRIDGING DIGITAL DIVIDE?

We understand the technical challenges that your business faces today. By promoting strategic engagement and hands-on involvement, we commit our time, resources and expertise to providing you with comprehensive, efficient fibre solutions that connect you to the rest of the world and offer you real business benefits.

Our mission

We strive to provide quality structured cabling and fibre and wireless network solutions and support services by a certified, professional team to public and private sector businesses nationwide. We're focused on implementing all our undertakings correctly, in time and within budget. We aim to be proactive in all our dealings and endeavour to deliver high-quality services to our clients that are aligned to their unique requirements and that meet their day-to-day needs.

Our vision

We envision becoming the cabling partner of choice for medium to large organisations in South Africa and sub-Saharan Africa, providing a comprehensive range of structured cabling, fibre and wireless network solutions and services.

Our people

Our greatest strength lies in our people. Our associates are experts and thought leaders in their fields and are committed to exceptional quality and producing measurable results for our clients and partners.

Our values

Our core values shape the culture of our company. They define who we are and guide how we behave and make decisions.

Innovation

We are determined to find the best-fit solutions and technology to ensure the continued success of our client organisations.

Commitment to quality

Fuelled by a passionate commitment to our client relationships and what we offer, we are persistent in achieving optimal outcomes.

Consistency

We continually seek to improve our capabilities, capacity and resourcefulness that manifests in quality, consistent service delivery and superior delivery satisfaction.

Valuing people

People are the key leverage and we empower people by appreciating and recognising their strength and ability to add value to quality outcomes.

Integrity

Our motives are reflected in what we do – deliver results on our service and delivery promises and offer honest analyses and recommendations.

SOLUTIONS

At BDD, we supply, configure, implement, support and maintain turnkey enterprise technology solutions that are customisable to our clients' requirements.

Networking and fibre optic infrastructure solutions

Our fibre network solutions consist of comprehensive, end-to-end solutions that span planning and the design of the network to execution and implementation, delivering value to our customers through quality, speed and innovation.

BDD offers aerial and underground long-distance fibre optic solutions as well as the many options of fibre optic access infrastructure (FTTX).

- Site surveys and documentation
- Pre-sales system design
- Networking engineering services
- Long-haul installations
- FTTX installations
- Fibre splicing and termination
- Fibre optic blowing, testing and repairs
- Civil works
- Project management

Structured cabling solutions

BDD provides the copper and fibre optic cabling for connecting voice and data across the LAN and WAN, and conducts comprehensive testing and CAD documentation services.

Whether upgrading current cabling networks, relocating offices or updating facilities, we have the experience and capabilities to provide you with an accurate scope of work, bid drawings and RFP documents that will eliminate costly change orders as the project unfolds.

Support services

- Cross talk
- Bandwidth
- Cable conformance
- Transmission error rates
- Fire prevention
- Cable management
- Maintenance and managed services
- Wayleave agreements and permits

EMPOWERMENT

Bridging Digital Divide is a wholly owned subsidiary of Ulwembu Business Services, which is listed on the national Broad Based Black Economic Empowerment (BBBEE) registry and classified as an EME with a level 1 contributor status.
